Children's Balance

Combination Formula

Flower essences work so well for children. It is easy to see the differences in a child and his or her behavior after flower essences have been administered. **Fleuresences** is very proud of our divinely guided combination formula for children -- "**Children's Balance**." We are constantly receiving positive feedback about our children's formulas. **Children's Balance Combination Formula** addresses the many facets of a child's life. It contains over 25 flower essences that strive to bring balance to a child in all ways.

The essence of **Orange** and **Red Clover** bring about a calming vibration and contribute to emotional stability and a reduction of fear. **True Wood Sorrel** improves the ability to concentrate and stay focused. Sense of purpose, self-esteem and trusting our own inner wisdom are enhanced by several different flowers. There are also essences in this formula to help children with changes and transitions. Our flower of the month, **Zucchini**, gives children inner and outer strength and stamina. **Broccoli** flower is for protection from peer pressure. **Pennyroyal** protects from negative imbalances in people and places around our children, situations that children so often can take on or absorb unconsciously into their own energy systems.

The formula surrounds the child in a reassuring vibration of love, comfort and security and offers enduring joy, laughter and childlike delight. This formula is recommended for children that have challenging emotional situations in their lives. It is good for those that are sensitive and easily impacted by negative people or places. It is good for learning disabilities and children who have trouble focusing.

If a child does not feel confident about his or her own inner wisdom and knowledge this formula will help them to feel more confident about themselves and their purpose in the world. Most importantly, there are flowers in this formula that bring about a sense of delight and joy, so that our children can truly be just that - children - relishing in this delightful experience on the earth plane. §

Zucchini

Cucurbita pepo

Flower of the Month

Up here in the northwoods of Wisconsin, the weather can be so cold that for many days, the temperature never goes above zero. We need all the help we can get to maintain warmth, momentum, strength and stamina to cheerfully fulfill our purpose and missions when it is this cold and the essence that we turn to for assistance is the flower of the **Zucchini** plant.

I am sure you have noticed how much immediate life force is represented by a **Zucchini** plant, but perhaps you have not noticed the huge, vivid yellow flower it produces. This golden blossom represents a robustness of spirit and unapologetic vitality.

One of the "plant signatures" (see November Newsletter) of this flower is the color yellow. The deep, golden yellow signifies that one area of its resonance is the third chakra, known in Sanskrit as the Manipura Chakra. The Manipura Chakra is our internal fire. It relates to our ability to generate forward momentum and be empowered in our lives.

Strong third chakra energy is well represented in people who have lots of energy and get things done. If you can see clairvoyantly, the Manipura Chakra looks like a sun in the belly, shining its golden rays in every direction.

Flower Essences

For Evolutionary Healing

By Elizabeth Chandler

*[It is the policy of **Fleuressences** and this newsletter to be truly educational in any way that we can. We would like to offer the following in-depth article, written by Elizabeth that was published in "In Touch," magazine in two installments, in this and February 2005 newsletter.]*

"In Touch" magazine is global in nature and seeks to create a visionary global connection. It is published in New Zealand and states that their goal is to "know everything" so that ultimately we will grow to understand the meaning of our own existence within the greater scheme of things." The articles in "In Touch." relate to the areas of healing and evolution for planet earth and her inhabitants.]

How would you like to take a flower essence that cleared negative affirmations held in your energy field that generations of your family had thought to be true? Or would you prefer an essence to enliven the threefold flame of divine power, wisdom and love in the chalice of your heart chakra? How about an essence that enhances your telepathic abilities?

Flowers have been used for thousands of years for healing purposes. Most of us know that dried **Chamomile** flowers infused to make a tea, calm, soothe and help you sleep. The oil from **Rose** petals is created to make an extract that clears heat, stabilized the heart and relieves irritability.

When we start to utilize flowers at the essence level, we juice up the wattage, we raise the frequency, or think of it as a treatment for all of the layers of our energetic system, not just the physical body. It is useful to remember that we are just 5% physical body and 95% energetic body. It makes sense to treat more than just the physical body. This includes the chakra system outside the body that is like an antenna, reaching up into the cosmos, turning to different frequencies. Activating this aspect of our being will ultimately enhance our evolutionary growth.

In the practice of making flower essences for healing purposes, nothing physical is transferred into the solution. The actual essence is the electromagnetic pattern of the flower. Just as there are nutritional elements found in the plants useful for the health of the physical body, so in turn are there patterns of biomagnetic energies discharged by the flowers on other frequency levels for the health of various energetic layers of your body's energy system.

Zucchini - continued from page 1

In the average person the third chakra is undeveloped or less than the size of a golf ball.

After taking **Zucchini** flower essence the wattage of the third chakra increases and the "inner sun of the belly" grows in size, from softball to even beach ball size!!! Not only then, are we empowered with a robustness and vitality to accomplish our goals and tasks, but we are warmed by our own inner fire in the cold of winter and warm those around us as well.

Even with a series of days without seeing the sun, our "inner fire" fills us with light and warmth and helps us to find ways to inspire others through our words or actions to feel that warmth.

Our combination formula "**Children's Balance**" contains **Zucchini**. Children almost always need the energetic assistance of robustness and vitality, because they are growing and changing so quickly. (See a more comprehensive article on **Children's Balance** in this newsletter.) Often **Zucchini** is combined in a **Personal Flower Essence Formula**, especially when more stamina, inner strength, vitality to overcome tiredness and exhaustion or just a general infusion of energy is necessary. §

Children's Balance...Testimonial

"The first time Andrew took his formula, there seemed to be a golden glow about him. He...is becoming more adventuresome with the variety of foods he is willing to eat. For the first Christmas ever, Andrew helped decorate the Christmas tree with joy and excitement.

Thank-you for the work you are doing. Your work is allowing miracles to happen."

Robert, Texas
Father of ten year old Andrew

Thank you flower devas !!!!!!!!

Flower Essence article - continued from page 2

You are working with the ethereal vibration of the plant, its life force, and its etheric imprint.

Red Schiso (perilla frutescens) is a vigorous member of the mint family. It is an excellent “vehicle” for the essences because when taken into our body in any form, it helps us to become “a superconductor,” able to more easily and comfortably hold greater light energy, and it amplifies the healing energies of the essences.

Red Schiso has a deep magenta color that contrasts well with the more dominant green and gray foliage colors of the garden. When made into a liquid, the energies of this plant are like liquid crystal. **Red Schiso** contains “perilla aldehyde” a preservative documented to have 1000 times the strength of synthetic food preservative, which prevent the growth of bacterial growth. A small percentage of white vinegar is added to the decoction. The completed decoction is combined with 50% purified water. The decoction is pure, vibrant and robust. The flowers dance in this **Red Schiso** because this crystalline-like vehicle holds as high a vibration as the flowers that are in it and magnifies their abilities. This is an alchemical union made in Heaven.

We have learned through our divine guidance that because a vehicle like **Red Schiso** is so high in frequency, it draws in a greater number of individual essences into a combination formula. It is as if the sacred geometry of **Red Schiso** attracts all the essences that are needed to make a formula that will address even the most chronic miasms or energetic blockages.

The actual pathway that the flower essences take to move through the physical body to the energetic bodies is complex. The remedy almost immediately settles mid-way between the circulatory (blood) and nervous systems. The two systems contain quartz-like properties and an electromagnetic current. The essence moves in the current to the energy meridians. The meridians are the interface or doorway between the physical body, and move to the subtle bodies or the chakra system.

The more evolved and healthy the human body is, the greater the number of crystalline structures found throughout the physical and subtle bodies. This includes cell salts, fatty tissue, lymph, red and white blood, glands of the endocrine system and even the bones. There is a resonance between the crystalline forms and the sacred geometry of the flower essences.

As flower essences are taken to correct various imbalances of the body, crystalline organization is strengthened. As crystalline organization grows, the alliance builds and greater number of combinations of essences can be taken. Many combination essences will be established in sacred geometry to allow for a more powerful shift in the energy field.

Various imbalances and toxins in the body are ultimately forced out due to the fact that they are vibrating at lower frequencies and hold no crystalline pattern or sacred geometry. They are eventually simply discharged from the body because they do not vibrate at the level of health that flower essences propel us towards. §

Flower Essence article – continued February 2005

“You need to claim the events of your life to make yourself yours.

When you truly possess all you have been and done, which may take some time, you are fierce with reality.”

Quotation by Florida Scott-Maxwell

ORCHID ESSENCE NEW VITALITY

Paphiopedium liemianum sp

This fascinating orchid offers the gift of vitality, stamina and strength. The “plant signature” (see November Newsletter) is that the blooms come in succession on a spike and each spike of the plant can be in bloom for a year or more.

This orchid is particularly good where there are chronic conditions of exhaustion and tiredness. Gives an energy boost during times of great fatigue. Excellent essence for if you have long-standing exhaustion but still need to maintain a challenging and demanding lifestyle.

Please call or e-mail for more information. §

Back to Basics

Sometimes we take it for granted that words we use on a regular basis are part of your vocabulary as well! Here are some terms found in the text of this newsletter that may need a bit more explanation.

Miasm - An energetic state which predisposes the organism to future illness. We will often see it as large negative structure in the energy field. The negative structure may be present because of the effect of a toxin or microorganism. **Miasms** may be acquired, inherited or planetary in nature. The essence of **Dandelion** is excellent for removing **miasms** from our energy field and is found in the combination essence formula **Healing Ways**.

Chakra - An energy center in the body which Downloads or uploads frequencies of energy, much like a transformer does for electricity. We tend to think of these transformations as step down transitions, but earth energies can be uploaded from the feet and root **chakras**. The **chakras** use subtle energy to convert into chemical, hormonal and cellular functions in the physical body. **Fleuressences** has many combinations of essences to enhance chakra functions. Call for more information.

Etheric - the frequency band or octave just beyond the physical octave. **Etheric** energy or substance vibrates at speeds beyond light velocity and has a magnetic character.

Escape

By D. H. Lawrence

*When we get out of the glass bottles of our ego,
and when we escape like squirrels turning in the cages*

of our personality

and get into the forests again,

we shall shiver with cold and fright,

but things will happen to us

so that we don't know ourselves.

Cool, undying life will rush in,

and passion will make our bodies taut with power.

We shall stamp our feet with new power

and old things will fall down.

*We shall laugh, and institutions will curl up like burnt
paper.*

"... get into the forests again.

We shall shiver with cold and fright.

But things will happen to us....."
